Coastal Erosion Risk and Nature-based Strategies to Enhance Resilience

Learn about the new countywide coastal resilience plan. This meeting will include a summary of the plan and process used to identify areas vulnerable to coastal erosion along the Lake County shoreline. It will also highlight nature-based strategies to enhance coastal resilience while protecting and enhancing the area's natural assets and access to recreation. Local examples from lakefront communities throughout Lake County will be reviewed to help illustrate how the "toolkit" of nature-based measures may be integrated into cohesive solutions that mitigate erosion, enhance ecology, and support recreational access and use.

Join Us!

Wednesday, November 18, 2026
6:00 – 7:30pm
Perry Community Center
2800 Perry Park Road, Perry OH 44081
